Year	15	48	110	3.4	2.6	42

Elevation: 2,875 feet

Direction of Prevailing Winds: WSW

Source: National Weather Service (Averages over a 13 year period)

#### WATER

City of Victorville has a large quantity of water, more than sufficient to supple basic domestic needs as well as the industry within that vicinity. We of course are concerned about the conservation of water in deference to our neighbors to the North. However, let me assure you that barring any catestrophic occurrence there is a more than adequate supply of underground water to supply our needs for many years to come.

There are areas in the desert where this is not true. To get further details on this issue write to: Mojave Water Agency - 16849 "D" Street, Victorville, CA 92392. (1-714-245-7717)

#### AIR

The Victor Valley is noted for clean air, however, on rare occassions high altitude photo-chemical smog is blown over from the San Bernardino/Los Angeles area. Over the last 10 years there have been a couple of light smog alerts in the Valley.
